Clearly, with so many ICD-10 codes, it's impractical to duplicate the Diagnosis Sheet included in the Paperwork Project.

Use this mapping tool for reference and enter the appropriate codes in the diagnosis sections, by condition, on your Treatment Plan form. You might consider laminating these pages for long-term durability.

Important: This reference tool is intended for use as a helpful resource for proper and efficient ICD-10 coding. It does not include the complete code definitions for those codes listed and does not represent the complete ICD-10 code set available for chiropractic use. Important coding instructions are not contained within this tool. A current year coding manual is recommended for use to verify the information described above.
