Diagnosis Codes to
Support Necessity
for Orthotics***

Diagnosis is the key to orthotic coverage by third-party payers. The payer's Medical Review Policy (MRP) outlines the coverage parameters for functional orthotics, including which diagnosis codes support medically necessary for custom orthotics. This list of covered diagnosis codes is gathered from many MRPs throughout the industry. However, they are subject to change, and are not a complete list. Always consult your ICD-10 coding manual and the payer's MRP as you contemplate which of your patient's conditions and diagnoses support coverage for custom orthotics.
